

# HENSEL PHELPS

Plan. Build. Manage.

Diana Mendez

- Joined Hensel Phelps in 2014 on the Marriott Project in Washington DC as a Laborer/Buck Hoist Operator
  - o While at the Marriott, she was identified as an individual always willing to go above and beyond her specific job duties as a laborer and would regularly help carpenters/foremen with toolbox talks, AHA development, STA reviews, and additional tasks.
- Participated in the ABC Carpenter's Apprenticeship Program for 4 years from 2017 to 2021.
  - o In addition to continuing to work full time at Hensel Phelps, she consistently attended ABC classes and was always an active participant.
  - o She graduated from the ABC program in August 2021, as a full fledge carpenter.
- Currently working on the East Campus Building 3 project in Ft. Meade Maryland
  - o While at ECB3, she obtained her tack welding certificate, and is currently an integral part in HP success prepping and installing precast and curtainwall embeds. Consistently, she is reliable with production, and has welded embeds for over 750,000 SF of building
  - o She is particularly self-sufficient and can take care of tasks by herself or with a small crew independent of an official foreman
  - o She is always outspoken with her foreman and general foremen when it comes to safety in her job tasks, as well as the job tasks of her coworkers
  - o Because of her self-sufficiency, work ethic, and safety focus, Diana is an ideal candidate for a carpenter foremen in the future, and potentially the first female general forewoman.
-
